Open New York, formerly More New York, began in earnest in 2017. Having grown tired of what they regard as the one-sided nature of land use politics in New York (a developer will propose a city-backed project, neighborhood groups vehemently oppose it), Open New York seeks to add a pro-development perspective to the anti-development chorus that often commandeers housing debates.

Its core philosophy mirrors that of other YIMBY—or yes in my backyard—groups in cities like San Francisco or Los Angeles, which advocate for doing away with exclusionary zoning, and combatting the exclusionary sentiment of wealthy enclaves they believe prevents cities from becoming more equitable.
